

EssilorLuxottica

WORLDWIDE LEADER IN FINISHING SYSTEMS

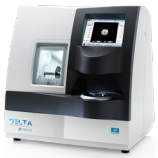

From In-Office Finishing to High-Volume Labs

- ▶ **Experience** — Celebrating 50+ years of best-in-class R&D and manufacturing of lens finishing systems
- ▶ **Quality** — ISO 9001-certified, Essilor Instruments performs quality-control procedures at all stages of the manufacturing process
- ▶ **Service** — All services performed by Essilor Instruments certified technicians

Edging Systems for the Office

DELTA SERIES

We reinvent simplicity for you

- Compact all-in-one
- Ideal for practices with space and/or budget constraints
- Also for offices with less demand
- Optical tracing with an option to add mechanical tracing
- Delta 200 and Delta 300 configurations
- Flexibility to add a TESS tracer for remote tracing to a lab

ES™ 700

Master Your Edging

- Composed of the ES 700 edger and TCB 800 automatic tracer-centerer-blocker
- Reaching position with ease
- Swift accuracy on all mountings
- New era of user-friendly and intuitive edging
- Absolute axis control

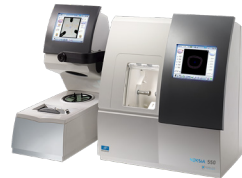

ES™ 800

Reveal Your Creativity

- Composed of the ES 800 edger and TCB 800 automatic tracer-centerer-blocker
- Perfect solution to demonstrate your craftsmanship
- Unique personalized eyewear styles with the M'EYE CUSTOM web app: M'Eye Sign, M'Eye Shape, M'Eye Clip

NEKSIA SERIES

Race through your workloads

- Mid-range robust edging system
- Automatic or manual blocking
- Simple, reliable, and highly-affordable
- High curve with Neksia 550 and Neksia 650
- Drilling available with Neksia 600 and Neksia 650

ES™ 700M

Master Your Edging with Hybrid Version

- Composed of the ES 700M edger and TCB 800
- Dual technology combining milling and grinding
- Capable of securing hydrophobic or delicate lenses
- Reducing the smell for mid- and high-index materials
- Diminishing lens swarf and water consumption

ES™ 800M

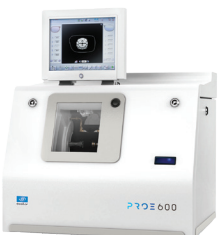

Reveal Your Creativity with Hybrid Version

- Composed of the ES 800M edger and TCB 800
- ES 800M has a dual technology that combines milling and grinding to secure edging and minimize axis deviation risks
- Perfect solution to demonstrate your craftsmanship
- Unique personalized eyewear styles with the M'EYE CUSTOM web app: M'Eye Sign, M'Eye Shape, M'Eye Clip

Edging Systems for the High-Volume Lab

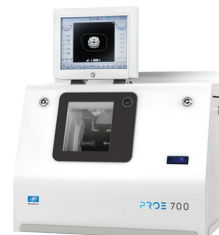

PROE™ 600

Edge ahead without compromise

- Innovative high-volume edger that offers compact design and high productivity
- Combines top-end precision and versatility with robustness and speed
- Easy and cost-effective integration into any lab configuration
- Perfect for growing labs

PROE™ 700

Compact edger with extended versatility

- Builds on the design of PRO-E 600
- A fully-optimized process with advanced features: Engraving, Half Jacket wraps, Chemistrie clips, super chamfering, and creative shapes

Here's What Our Customers Are Saying About Us

“ We have thoroughly enjoyed our **Essilor Instruments edging systems**. They are easy to operate and our technicians mastered them fairly quickly. Our Essilor Instruments sales manager was and is very supportive to our needs, concerns, and questions. We have not had a need for technical assistance but we are comfortable with knowing they probably will be there if the need should arise.

Great job to Essilor Instruments for creating equipment that offers valuable rewards and returns. Our in-house lab has been a wonderful asset for our bottom line but more importantly, it has improved our patient satisfaction immensely! Thank you!

Special thanks also to our Essilor Instruments sales manager for helping us make the right choice!

The Optical Shop of WA Inc., Shelton, WA

“ The **Neksia™** has completely changed the way our lab operates. The speed and efficiency of the Neksia system has allowed us to double our lab's output. The Essilor team that installed the Neksia was second to none. They had the unit installed and had us completely trained in just a few hours. This speaks to the knowledge of the sales manager and also to the ease of the Neksia system. ”

Practice Manager, Alma, GA

“ After losing all our edging equipment to Hurricane Harvey, we needed a workhorse to get us back up and running. The **Delta2™** was easy for our opticians to learn to use and does the finishing for all three locations we have! I would definitely recommend it to others. ”

Memorial Eye, Houston, TX

“ The versatility of the **PRO-E™ 600** allows us to produce high volumes of work when needed and the ability to do specialized high wrap and difficult Rx's with ease. With the limited amount of daily maintenance needed, your staff can concentrate on producing the quality work your ECPs have come to expect. ”

Southern Optical, Morrisville, NC
